Daniel Wal

Web Developer & Software Engineer

Baguio City, Philippines | 09452863646 | danny192168@gmail.com | linkedin.com/in/daniel-wal-928277434 | github.com/danny192168

SUMMARY

Self-taught developer and first-year Computer Science student at the University of the Cordilleras. Experienced in building full-stack web applications with React, Next.js, and Firebase. Runs a 171-member student-run tech community, actively volunteers for software engineering mentorship initiatives, and has responsibly disclosed critical security vulnerabilities. Currently integrating AI-assisted development workflows using tools such as Cursor, Kiro, and Claude to accelerate application building and improve code quality.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, HTML, CSS
Frameworks & Libraries: React, Next.js, Bootstrap, Tailwind CSS
Tools & Platforms: Git, Firebase, Supabase, Vercel, Cloudinary
AI Development Tools: Cursor, Kiro, Claude, Antigravity, and other AI-assisted coding tools

PROJECTS

PinesList *Next.js, React, Firebase, Cloudinary, Vercel*

- Built a full-stack directory web app for buffets, samgyeopsal restaurants, and tourist spots in Baguio City.
- Implemented user authentication, save functionality, reviews, pricing, location data, and category-based filtering.
- Developed a recommendation system suggesting spots with commuting details, entrance fees, and descriptions.

Cat-bolz Messaging *Firebase, Real-Time Chat — Built during Grade 11*

- Developed a real-time messaging app with user authentication and a shared chat server, using Firebase for backend services including authentication and data storage.
- Implemented secure login and message persistence for seamless user communication.

Batchzone *Open-Source Game Platform*

- Built a free, open-source web-based game platform replicating premium features of paid game sites at no cost.
- Released as open source to provide accessible gaming experiences for students and casual players.

EXPERIENCE & LEADERSHIP

Community Lead — CITCS Discord Server *Student-Run Community, 171 Members*

- Created and manage a student-run Discord server for the College of Information Technology and Computer Science.
- Scaled the community to 171 members through curated events, resource sharing, and peer-to-peer mentorship.
- Mentor members by teaching technical concepts, answering questions, and guiding them on tools and projects.

Outreach Volunteer — TWBL (The Work Behind The Luck) *Software Engineering Mentorship*

- Supported outreach and participant coordination for a software engineering mentorship organization.
- Promoted the Baguio mentoring event through a personal Discord network, helping drive attendance to 50 participants.
- Served as a point of contact for participants, providing event details and logistical coordination.

Security Researcher — Independent Responsible Disclosure *Cybersecurity*

- Discovered and responsibly disclosed two critical vulnerabilities in an academic system and a government-used platform.
- Collaborated with system administrators to validate findings and implement remediation, preventing potential data breaches.

Front-End Developer — Camp Bali Resort *Freelance*

- Designed and developed a responsive landing page for Camp Bali Resort, delivering a visually engaging web presence.

PROFESSIONAL DEVELOPMENT

Kiro Workshop — Kiro x AWS User Group Baguio *Top 4 Best Build*

- Attended an intensive workshop on the Kiro AI IDE, learning AI-assisted development with steering docs, context-aware prompting, and iterative refinement workflows.
- Used ChatGPT for media asset generation, Sakana AI for conceptualizing and initial planning, and Kiro AI for the main integration and development of the portfolio project.
- Leveraged my technical background to debug, polish, and manually refine AI-generated code where necessary, going beyond the workshop's main objective.
- Selected among the top 4 best builds for implementing the most functional features, showcasing 3 unique games, and being the only participant to deploy the site online.
- Judges appreciated the stretch beyond requirements, the creative use of multiple AI tools to conserve tokens, and the decision to push past limitations rather than stay within the given scope.

EDUCATION

Bachelor of Science in Computer Science *University of the Cordilleras — First Year*
